

Manitoba Schools must register at Call2Recycle.ca/Back2School by June 30, 2016 to be eligible to enter the contest!

Kids, Help Recycle Batteries for a Cleaner, Healthier Planet!

Back to School Battery Recycling Contest

September 19-30

We need your help keeping batteries out of landfills!

All through the Summer, collect used household batteries* under 5 kg from your family and friends! Then, bring them in from **September 19-30**, and drop them off into your school's battery recycling box.

You'll not only support the environment, but you'll be helping your school to win!

The top school will win a grand donation towards school equipment, and 3 other schools will be selected on the bases of their recycling efforts and displays, to receive donations!

To find the nearest Call2Recycle collection site, please visit www.call2recycle.ca. You can drop off batteries at these collection sites throughout the year.

**Always bag or cover terminals of used Lithium and Small Sealed Lead Acid (SSLA) batteries with tape*
